

Home Health Triggers

Individuals who experience one or more of the following situations could benefit from home care or a home nurse evaluation:

- History of falls
- Frequent Emergency Room (ER) visits or re-hospitalizations
- Pattern of daytime or after hour calls to the physician's office
- Difficulty managing a chronic illness
- Use of five or more medications
- Change in weight or appetite
- Decline in mental status or behavior
- Increase in fatigue
- Decrease in functional ability
- Difficulty managing daily personal care
